

# How iPaaS Can Help Travel Firms Scale-Up & Get More Cost-Efficient

## CURRENT CHALLENGES

Siloed Data

Hardware Bottlenecks

Integrating disparate systems

Slow speed-to-market

## iPaaS BENEFITS

### Seamless Cross Platform Integrations

Seamless integration with cloud software as well as legacy systems & databases

### Demand-Driven Scalability

Flexibility to increase server power for a particular time period when traffic is high, such as peak season

### Cost & Resource Optimization

Pay only for the computing power and storage you use and do away with hiring expensive developers

### Quick & Easy Access To Mission Critical Data

Access relevant data from any source located anywhere on a real-time basis for better decision making

### Workflow Automation

Configure custom workflows between applications and eliminate manual errors

### Faster Speed To Market

Build and launch applications quickly for fast time-to-market
