

Always On

Major Cloud platforms like AWS, Google and Azure offer 99.9% uptime which means your business is always online

Monitoring & Analytics

Cloud platforms offer in-depth data analytics & custom reports to help you make critical business decisions

Flexibility & Scalability

You can instantly increase/decrease the bandwidth as per fluctuations in the demand

Interoperability

Being on the cloud facilitates easy data exchange with other cloud systems with workflow automation

8 REASONS for Travel Firms to Move to the CLOUD

Cost Savings

Your hardware costs go down as you only pay for the server power you use

Disaster Recovery

Moving to the cloud provides you much faster data recovery in emergency situations than on-premise

Data Security

Cloud platforms have much stronger security controls & monitoring than on-premise, including added data encryption

Mobility

Your staff and your clients can access key corporate data & applications on mobile to fit their busy schedules

Global Travel Brands Successfully Using The Cloud
