

6 Reasons Why Travel Agencies Should Choose A SaaS Solution Rather Than On-Premise

Faster Time-To-Market

Your travel agency can go live quicker as the application is already deployed & configured on the cloud

Lower Cost

In the SaaS model, cost is spread over a large customer base so the price is significantly lower than on-premise

Automatic Updates

New releases & feature updates are automatically pushed across all users periodically to ensure latest technology

Inclusive Connector Maintenance

SaaS Subscription includes connector maintenance and meta data updates for travel agencies with supplier APIs

Doesn't Require IT Infrastructure

A SaaS system is hosted and maintained by the vendor which saves high server cost & IT team salaries

Can Be Managed Remotely

A SaaS solution is cloud-hosted, allowing travel agencies to access the software from anywhere, anytime
