

Why Travel Firms should choose a **SaaS** -based Travel ERP

AFFORDABILITY

SaaS is available on a subscription basis that includes hosting, upgrades, maintenance and a degree of customer support. There are no large up front costs and your subscription cost will depend on your needs and the size of your business

SCALABILITY & ACCESSIBILITY

SaaS provides a lot of room to scale your business - start with only what you need and then add more modules as your business grows. A SaaS system works on all devices and can be accessed from anywhere in the world

AUTOMATIC UPGRADES

Since SaaS applications are centrally maintained, all the system updates and new features are automatically pushed out to all the users, ensuring that you will always have the most up to date software

DATA BACKUPS & SECURITY

SaaS solutions ensure complete data security and automatic backups without user intervention, thus ensuring integrity and easy retrieval of your data whenever necessary

MINIMAL MAINTENANCE

SaaS systems allow travel agencies to focus on their core business and not worry about the technology. Your system is hosted and managed by a team of experts on your behalf, which significantly reduces your IT manpower cost and operational headaches

FAST TIME TO MARKET

If you use a SaaS system, you can launch your products quickly as the software is already built and ready to use. It just needs to be configured for your specific business initially and you're good to go!

INCLUSIVE SUPPORT

SaaS subscriptions have a degree of support built-in which would suffice most of your requirements. Additional support hours can be easily purchased as an add-on
